

The extremely flat temperature protectors of the F series are miniature bimetal switches with a wide range of applications in the temperature sensor technology. Because of their dimensions they are ideal for temperature monitoring in very confined spaces. Among other applications they are used in electronic components and help to further miniaturise devices. Both signal currents and currents up to 250 mA are controlled reliably. The contacts open in a snap action when reaching the cut off temperature and close again automatically when the temperature decreases to the reset temperature. Numerous customizations extend by symmetrical design the spectrum of applications.

Customer specific solutions

Our creative R&D team turns your ideas into innovative products. Please contact us.

Extremely flat design

by intelligent construction and most precise production

Very compact construction

by wire ports integrated into the housing

Thermally solid connections

by welded wire connections

Constant dimensions

by front side mounted wires for all wire cross sections

PCB application

by integrated THT and SMD terminals

Position-independent use

Constant resistance

by optimal contact material, high contact pressure and sliding contacting

Consistent high quality level

by automated production with integrated monitoring

TMC product range overview

Temperature limiter:

Product design	Feature	Application	Series
	automatic reset	up to 250 mA	F
	automatic reset	up to 6,3 A	С
	automatic reset	up to 16 A	G
	selfhold	up to 10 A	R
	normally open	up to 1 A	0

Temperature sensors:

Product design	Version	Features	Series
1	PTC	sudden change of resistance	М
	PT1000 NTC	consistent dimensions	s
	Platinum sensor	extremely precise	PT

Temperature limiter F series **Technical specifications**

TMC - Manufacturer - Batch number A001 F1B - Type F1, version B - Nominal switching temperature 150 °C 150B Tolerance class B

Specifications

Type	F1
Туре	The state of the s
Contact version	Normally closed (nc), snap action
Switching cycles	10.000 cycles
AC cos φ = 1,0	250 mA/250 V
DC resistive	400 mA/48 V*
Nominal switching temperature (NST)	in 5 K steps
Standard	60 °C 160 °C**
Approved	60 °C 160 °C
NST tolerance	± 5 K (code letter B)**
Reset temperature (RST)	40 K \pm 15 K below NST (> 35 °C)
Resistance	$<$ 50 m Ω
Contact bouncing time	< 1 ms
Dielectric strength	2 kV
Ambient temperature	T180
Protection level	IP00**
Protection class	Suitable for use in devices of class 1 & II
Principle of operation at degree of	Type B: clean
contamination	Type C: normal

^{*} TMC measurement ** different values on request

Versions

Version W	Version B	Version L	Version S
Switch not insulated	Switch insulated	Switch not insulated	Switch not insulated
2,3	8,4	0,7 5,08 0,3	8,4 0,7 5,08 5,08
Leads: stranded, solid	Leads: stranded, solid	Connectors: Pin	Connectors: SMD

Dimensions in mm. Resistance to vacuum impregnation on request.

Wires

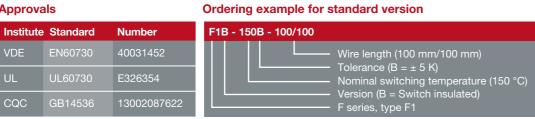

Standard Type (insulation) up to 150 °C: ISO F Length 100 mm / 300 mm Stripped length 5 mm 0,14 mm²

Triplet version B

Example

Alternative or UL listed wires on request.
